

# Ecoshade® series

Optimized designs for maximum light control

Simply put – Ecoshade® is an effective way to control the sun, reduce demand on your HVAC system and look good while doing it. Ecoshade® is available as a plate outrigger or framed system to meet the needs of any architectural application. An array of standard outrigger and infill options allows you to customize Ecoshade® and meet your project's aesthetic requirements.

## Features and Benefits:

- Wide selection of outriggers and infills
- A great curtain wall shading solution
- Simple lines with bold edges
- Modern accent complements any design
- Modular design and construction
- Mechanically fastened infill and airfoils
- Reduces solar impact
- Opportunity to bring controlled daylight into building\*
- Reduces demand on HVAC systems
- Minimum maintenance
- Excellent durability and support

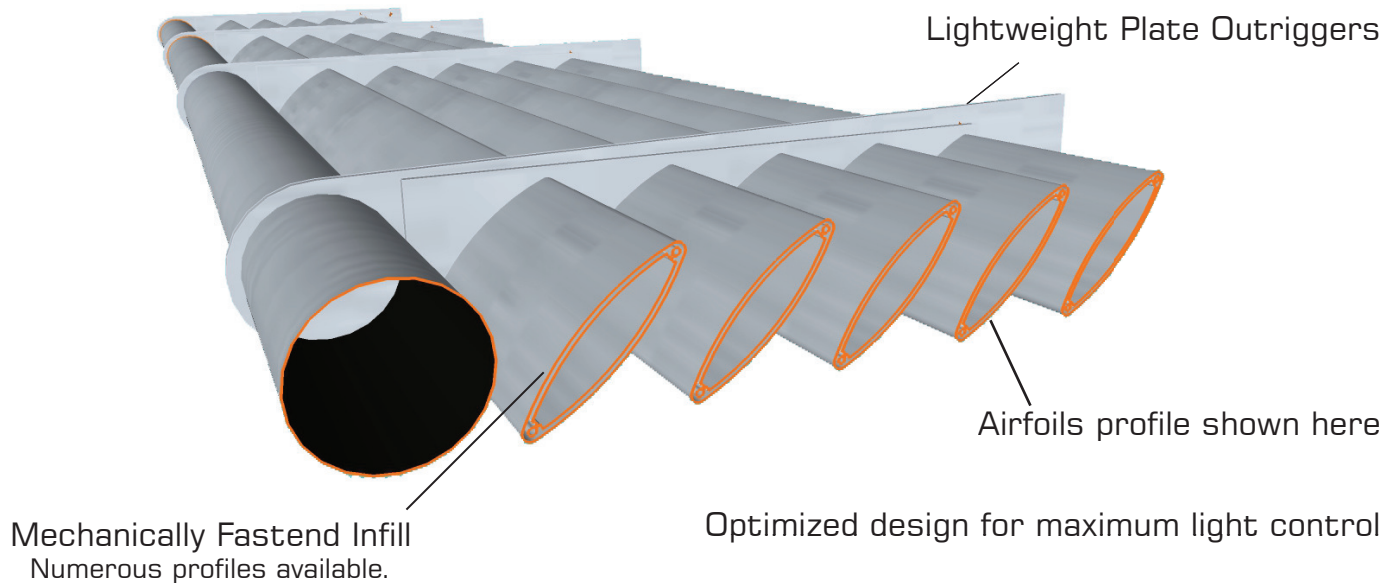

**\*MASA Architectural Canopies Ecoshade® and Extrudeck® systems can help you achieve LEED Credits.**

Innovative environmental control through creative design

# Ecoshade® series

Optimized designs for maximum light control

**Applications:** Windows / Curtain Walls / Doorways / Bland Facias

## Technical Data:

- All extrusions meet criteria for ASTM B221 and ASTM B429
- All products are engineered to meet standards of ASCE for design loads
- All material is T5/T6 high strength extruded aluminum
